

laboratory report

PATIENT	Surname: xxx
	Forename: xxx
	DOB: 11-Nov-1965
	Sex: M

LABORATORY	Sample date: 06-Oct-2009
	Report date: 07-Oct-2009
	PID: xxx
	Lab ref: xxx

ANTI CCP ANTIBODIES

Test	Result	Units	Range
------	--------	-------	-------

IMMUNOLOGY

Anti-CCP	Positive - 440 U/ml	(Normal = < 10 U/ml)
----------	---------------------	----------------------

Combined detection of IgM-RF and CCP antibodies yields higher predictive values for classical RA and other rheumatological disorders, than IgM-RF alone.

Detection of CCP antibodies helps in early prediction of erosive RA with reported specificity of > 96%
